

Question to be Answered/Addressed:

Do Americans support a 'summit' between U.S. President Donald Trump and North Korean leader Kim Jong Un? And do those opinions vary by geographic region?

Audience/Customer:

Political allies and spokespeople (and even critics) of the President.

Project Details:

Using Twitter data, perform sentiment analysis to determine if Americans support a 'summit' between U.S. President Trump and North Korean leader Kim Jong Un. First, authorize a Twitter API client, fetch tweets, and parse the results. As a follow-up visualization, map the locations of analyzed Twitter users to determine how these views vary with geography. The deliverables will include a small slide deck that feature key metrics and statistics as well as at least one US map graphic.
